

KYRA DANG

301-310-2691 | ktbdang04@gmail.com | www.linkedin.com/in/kyra-dang | kyrad2004.github.io/Portfolio

EDUCATION

University of Washington, Seattle, WA

Sept 2023- June 2027

Bachelor of Science, Electrical and Computer Engineering (ECE)

- GPA: 3.74/4.00
- Relevant Coursework: Circuit Theory, Data Structures and Algorithms, Computer Architecture, Hardware & Software Interface, Network Security & Cryptography, Digital Circuits and Design, Signal Processing, Machine Learning

RELEVANT EXPERIENCE

Incoming Solutions Architect Intern | APIs, Satellite Communications Framework

June 2026-Sept 2026

Amazon Leo (Project Kuiper)

- Developed a customer-facing platform to streamline API integration, featuring live API calls and an embedded AI Agent
- Utilized Amazon Bedrock AgentCore, Lambda, API Gateway, IAM, and MCP
- Participated in customer-facing B2B sales and technical calls, gaining exposure to enterprise satellite communications solutions and client engagement strategies

Engineering Student Researcher | Bluetooth, RaspberryPi

June 2025 – Sept 2025

San Francisco State University, *San Francisco, CA*

- Investigated cognitively assistive robots and integrated them with Augmentative Alternative Communication (AAC) devices in collaboration with a speech-language pathologist
- Integrated and tested Bluetooth connection between Raspberry Pi and existing AAC devices
- Synthesized 50+ literature reviews, contributing as a co-author to a team submission accepted for presentation at the California Speech-Language-Hearing Association (CSHA)

Third Eye for the Blind | Arduino Uno, Multimeter, Oscilloscope

June 2022-Aug 2022

Independent Engineering Project

- Developed an embedded wearable device with Arduino and C++ that alerts visually impaired users of nearby obstacles
- Designed and assembled device circuitry, using an oscilloscope and multimeter to verify signal integrity
- Built the full embedded system, writing sensor drivers, and feedback-control firmware, delivering real-time alerts

Frogger Game | SystemVerilog, Quartus Prime, ModelSim

Jan 2025-March 2025

University of Washington, Digital Circuits and Logic (ECE)

- Designed a digital system to play an interactive De1-SoC FPGA Frogger game using finite state machine logic
- Implemented timing controllers for display and button input debouncing and refresh
- Validated FPGA logic using Quartus Prime and ModelSim verification, achieving 100% simulation pass rate

ADDITIONAL EXPERIENCE

Member, Toy Donation Chair, HuskyADAPT

Sept 2023 – Present

University of Washington, *Seattle, WA*

- Modified toys with universal headphone jacks for use with assistive switches to support children with disabilities
- As Toy Donation Chair, streamlined donation and outreach pipelines with 15+ local clinics and schools to distribute 130+ toys nationwide and foster community partnerships

Engineering Ambassador, University of Washington College of Engineering

Mar 2024 – Jun 2026

University of Washington, *Seattle, WA*

Director of Continuous Recruitment, Delta Gamma Sorority

Jan 2025 – Jan 2026

Beta Chapter- University of Washington, *Seattle, WA*

SKILLS

Languages: Python, C++, SystemVerilog, C, Java, JavaScript

Tools and Technologies: AWS, APIs, Arduino, Altera, Quartus Prime, Git, ModelSim, KiCad PCB, Logic Analyzers, Oscilloscopes, Multimeters, Microcontrollers
